#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Information Disclosure Statement***

The information disclosure statement filed April 16, 2004 has been made of record and the references cited therein have been considered by the examiner.

### ***Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. The claims are not numbered, and dependent claims refer to other claims that have not been numbered. Because the claims were not numbered and the dependency of the claims could not be determined, the examiner did not attempt to assign numbers to the claims although the subject matter of the claims was examined, as below.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with punctuation and grammatical errors that render examination of the subject matter of the claims difficult. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The claims are rejected under 35 U.S.C. 102(b) as being anticipated by Beane et al. (U.S. Patent Application Publication No. 2002/0022762).

Beane et al. teach a warming and cleaning device 110 for a laparoscope 10 comprised of a housing 112, a heat-conducting tube 114, a sponge 116, a container or bottle 118 and a heating element, such as a heating pad 120 (see Figures 2A to 5F). Bottle 118 is filled with a solution that can contain an antifogging solution and when the surgeon squeezes bottle 118, the bottle dispenses the solution to moisten sponge 116 (see page 3, section 0056). The heating pad 120 includes an outer pad 146 that encases a chemical mixture that, when activated, generates an exothermic reaction (see page 3, section 0057). Pad 120 is wrapped around the tube 114 inside of housing 112 (see Figure 2A). In operation, the distal portion 16 of laparoscope 10 is inserted

through opening 240 until the lens portion 14 abuts sponge 216, so that the lens portion 14 is cleaned and defogged and the laparoscope 10 is warmed (see page 4, section 0070). The housing 112 can be made from a hard plastic, which would make it shock absorbent (see page 4, section 0061). A wiping compartment 312 is provided in an alternate embodiment and a hook and loop assembly 180 can be used to attach the device to an operating table (see page 4, section 0066).

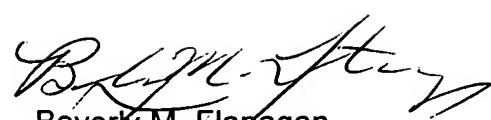

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beverly M. Flanagan whose telephone number is (571) 272-4766. The examiner can normally be reached on Mondays, Tuesdays and Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
